Washington, DC 20590

DEPT. OF TRANSPORTATION  
DOCKETS

2005 NOV 22 PM 4:28

Dear Secretary Mineta, *NHTSA-2005-22223-1667*

I am writing to urge you to tighten the Bush administration's proposed fuel-economy standards and compel automakers to build fuel-efficient trucks and SUVs.

Events of the past few months have rendered the administration's new mileage standards obsolete -- if not downright ridiculous. Gas prices have soared to all-time highs and yet the president actually proposes to weaken fuel-efficiency standards for gas-guzzling trucks and SUVs -- and to exempt dinosaurs like the 8,600-pound Hummer from standards altogether.

It's time for Bush to stop listening to his auto-industry cronies and pay attention to the needs of the public. People want fuel-efficient cars. That's why sales of U.S.-made SUVs are off up to 50%, while Asian economy models are seeing double-digit sales increases.

By placing the lowest standards on the heaviest vehicles, the new fuel-economy rules encourage automakers to build bigger trucks. I urge you to raise mileage standards for all vehicles and compel automakers to build the fuel-efficient cars and trucks Americans deserve. Please tell me how you intend to address this important issue.

Sincerely,

Martha Barclay

Events of the past few months have rendered the administration's new mileage standards obsolete -- if not downright ridiculous. Gas prices have soared to all-time highs and yet the president actually proposes to weaken fuel-efficiency standards for gas-guzzling trucks and SUVs -- and to exempt dinosaurs like the 8,600-pound Hummer from standards altogether.

It's time for Bush to stop listening to his auto-industry cronies and pay attention to the needs of the public. People want fuel-efficient cars. That's why sales of U.S.-made SUVs are off up to 50%, while Asian economy models are seeing double-digit sales increases.

By placing the lowest standards on the heaviest vehicles, the new fuel-economy rules encourage automakers to build bigger trucks. I urge you to raise mileage standards for all vehicles and compel automakers to build the fuel-efficient cars and trucks Americans deserve. Please tell me how you intend to address this important issue.

Sincerely,

Bacchus Productions

Dear Secretary Mineta,

I am writing to urge you to tighten the Bush administration's proposed fuel-economy standards and compel automakers to build fuel-efficient trucks and SUVs.

Events of the past few months have rendered the administration's new mileage standards obsolete -- if not downright ridiculous. Gas prices have soared to all-time highs and yet the president actually proposes to weaken fuel-efficiency standards for gas-guzzling trucks and SUVs -- and to exempt dinosaurs like the 8,600-pound Hummer from standards altogether.
